

Pro Tech Service Kits

Pro Tech Service Kits contain a pre-loaded system injector with the additional hose to use with your service gauges. Kits have specific uses with complete instructions included in each package. Refills consisting of two pre-loaded system injectors are also available. Each 2 oz. injector good for 1 to 6 tons.

R3 AC Leak Repair™

Two 1 oz. Plastic Injector Kit. R3 effectively seals slow leaks in AC and refrigeration systems, such as Condensers, Evaporators, Hoses, Gaskets and O-Rings while also lubricating, conditioning, and revitalizing them. Improves system lubrication up to 1200%. It provides a permanent seal for leaks up to 0.5 mm in size and includes a UV dye to detect larger leaks that may require repair, preventing future leaks. Compatible with all refrigerants and refrigeration lubricants, R3 has undergone extensive testing to ensure it does not clog AC compressors or recovery equipment. Additionally, it does not react with moisture or oxygen.

Trace 2® Pro Tech Service Kit

2 oz. Injector Kit. Trace 2® Leak Detection kit contains a vibrant red dye that, when exposed to UV light, transforms into a bright purple-blue color, making leak detection easy without interrupting system operations. It is universally compatible with all refrigerants and refrigeration lubricants. It leaves no residue or deposits in the systems. It is particularly effective for detecting intermittent leaks, as the red color and fluorescent tracer remain on the equipment until wiped off. Safer than a Halide torch and will never give a false positive. It works on all leaks and leak types, including those caused by metal porosity. It is effective in all weather conditions, including wet and humid environments.

Acid Neutralizer® Pro Tech Service Kit™

2 oz. Injector Kit. This kit neutralizes and prevents acid formation in AC and refrigeration systems, as well as recovery equipment, caused by oil breakdown, moisture, and compressor burnouts. It is compatible with all refrigerants and lubricants, works quickly, and circulates efficiently. Additionally, it leaves no solid residues and helps prevent system burnouts.

PRO-A™ Pro Tech Service Kit

2 oz. Injector Kit. The best Polarized Refrigerant oil additive specifically designed to renew AC and refrigeration systems. It is compatible with all refrigerants and refrigerant lubricants. This polymer-free solution has been thoroughly tested to ensure it does not clog A/C compressors or recovery equipment, and it does not react with moisture or oxygen. With a polarized refrigerant oil additive, it provides the following benefits: Quieter Compressor, Improves Heat Transfer, Reduces Energy Consumption/Friction, Frees Sticky Expansion Valves, Increase lubrication by 1200%

Thawzone Pro Tech Service Kit™

2 oz. Injector Kit. This Kit quickly unfreezes refrigeration systems, preventing acid formation and keeping moisture at bay. Its biodegradable dehydrant properties provide flexibility, working effectively with or without solid dryers. Compatible with various equipment sizes, it operates seamlessly with all refrigerants and refrigeration lubricants, ensuring excellent moisture control, even in advanced systems.
